Matt Genovese

HELLO

ABOUT

Engineering, in many shapes and forms.

Software

Started programming on the Commodore VIC-20 at 8 years old. Taught myself BASIC, then 68XX assembly by sixth grade, and moved on to Pascal by high school. These days, I'm fluent in C, C++, Java, PHP, Perl, and more. I've been working in Linux since kernel 1.3.

Websites

I've been a Drupal developer since 2007, and I'm a big fan of the platform. I am especially good at understanding the problem, and creating an 80% solution using existing Drupal modules, and developing the other custom 20% as needed.

Chips

Spent twelve years in the semiconductor industry both as a Product Engineer and a Verification Engineer, focusing on PowerPC-based SoC's. In terms of functional verification, I specialized in test bench methodology and development.

Community

Founded Door64 in 2007 with a goal of serving the high-tech demographic in Austin, Texas through targeted initiatives and events. Door64 has produced over 100 events from networking happy hours, job fairs, conferences, and other targeted engagements tied to specific results that directly benefit the Austin-area technology community. Countless technology professionals have found jobs, employers found their critical tech hires, companies found new business leads, and new employers arrived and grew in Austin through this unique and focused approach to community engagement.

STRATEGIC TECHNOLOGY COMMUNITY ENGAGEMENT

Consulting for Chambers of Commerce

Overview

Is your Chamber of Commerce serving the unique needs of your technology industry?

Every city hosts a technology community with individual professionals, employers, user groups, and universities collectively driving innovation and local prosperity. The local Chamber of Commerce is in an excellent position to serve the unique needs inherent to that ecosystem, and in turn create value for each constituent and drive economic growth for your region.

Learn the strategies to create value and foster growth in your local technology industry based on the model implemented and refined by Matt Genovese through the Austin, Texas-based organization he founded, Door64.

What is Door64?

door64 STEM Events

Matt Genovese founded Door64 in 2007 and within five years grew it to become Austin's largest networked group of technologists with 30,000 members. Door64 has designed and produced over 100 events from networking happy hours, job fairs, conferences, and other targeted engagements tied to specific results that directly benefit the Austin-area technology community. Countless technology professionals have found jobs, employers found their critical tech hires, companies found new business leads, and new employers arrived and grew in Austin through this unique and focused approach to technology community engagement.

What Your Chamber of Commerce Will Learn

* How to attract and retain local technology talent
* Detailed examples of successful, proven events that generate significant revenue while serving the technology community
* How to create events that attract technology employers to your city
* How to accelerate the technical recruiting efforts of employers through activities uniquely available to the Chamber
* Tested online tactics for growing your following and awareness in the local technology community
* How to avoid pitfalls that will dilute your ability to deliver value to your technology community

Door64 Networking Event, 2012

What Others Are Saying

The services of Door64 have been especially helpful as Austin's economy has experienced a significant rebound within the technology sector. Door64 has helped position Austin as the location of choice for many companies focused within this sector.
— Brian Gildea, City of Austin Economic Development

Door64, has become one of the most important ways for employers and talent to connect in Central Texas.
— Drew Scheberle, Senior VP Education and Talent Development, Austin Chamber of Commerce

We consider ourselves lucky to have Door64 working for us.
— Eric Overton, Dillotronics

My last company was a major sponsor of Door64 due to my relationship and experience with Matt, and our interest in increasing our technology brand within the local tech community. This proved to be a very successful partnership, and as a result, I have hired numerous talented engineers. Door64 brings companies and people together for the greater purpose of bringing about awareness of what's happening in the Austin High Tech market, week-to-week and month-to-month.
— Holly Berry, Charles Schwab

Door64's events have become the most important part of my networking activities... I have not missed a single event there this year. Door64 has made networking easy and enjoyable in Austin.
— Kenny Rice, Chairman, IEEE Central Texas Section

Working with Door64 has really enabled us to reach out to the local Austin tech community to not only let them know we are here to support them but to hear first-hand what they want/need/care about.
— Monique Carreon, CyrusOne

I partnered with Matt and Door64 last year by sponsoring a Happy Hour event and cannot tell you how wonderful an experience it was. The event resulted in over 100 attendees and an inflow of resumes and potential candidates for positions we were looking to hire that we would have otherwise not had.
— Kevin Tougas, NextGen Healthcare

I continue to meet [hiring] candidates only because of the dearth of information provided to the technical community of Central Texas through Door64's offerings that attract these highly talented people.
— Susan Thayer, Demand Media

User Experience (UX) Designer

Submitted by knguyen on Thu, Dec 20 2012 - 2:08 PM   Computer Task Group

Job Description:
SW - UI/UX
Location:
Austin Metro

CTG is immediately hiring a User Experience (UX) Designer to engage in Power Systems software design and usability evaluation for a Fortune 20 client in Northwest Austin. Candidate should possess practical and educational experience. Knowledge and experience in related topics, such as web application development, agile software development, information architecture, Unix or AIX, and IBM Power systems, are a plus.

The work for this contract must be completed onsite at the client in Austin, TX. No work remote or telecommute options are available.

If interested, please immediately apply to this requisition using the link provided. For additional information please call Kathy Nguyen at 919-400-7132. Thank you for your interest!

Qualifications:

Required Skills for the User Experience (UX) Designer include:
• Experience in user interface design, wireframing, navigation design, websites and packaging
• Deep understanding of Human-Computer Interaction (HCI) theory and design processes
• Experience with creating mock-ups and/or prototypes that illustrate user interaction
• Developing design specification documentation intended to be used for engineering development
• Tooling experience required: Axure, PhotoShop
• User research
• Usability testing and other usability evaluation methods
• Usability engineering methods and principles
• Knowledge of usability evaluation tools such as Morae
• User experience/interaction design
• Excellent writing, presentation, verbal communication, and team collaboration skills
• Education background preferred:
• Human Factors Engineering, Psychology
• Human Computer Engineering, with specialties in Human Computer Interface
• User Interface Design, Human Experimental Design, Cognitive or Experimental Design

Job type:
Contract / Consultant
Company Background:

Backed by 40 years' experience, CTG provides IT application management, consulting, software development and integration, and staffing solutions to help Global 2000 clients focus on their core businesses and use IT as a competitive advantage to excel in their markets. CTG combines in-depth understanding of our clients' businesses with a full range of integrated services and proprietary ISO 9001:2000-certified service methodologies. Our thousands of IT professionals based in an international network of offices in North America and Europe have a proven track record of delivering solutions that work. More information about CTG is available on the Web at www.ctg.com.
